the design and construction of moulds for plastics and die-casting

25 YEARS' EXPERIENCE

ST.F is backed by many years experience in the plastic and die-casting sectors and offers itself as a qualified supplier for designing and implementing moulds for technical and aesthetic items.

The design

A team of reliable and skilled people are able to offer complete technical solutions employing the most advanced software technologies:

- 2-D design
- 3-D design and modelling
- Tool (CAM) paths of complex surfaces
- Paths for EMD machines on complex and evolved shapes

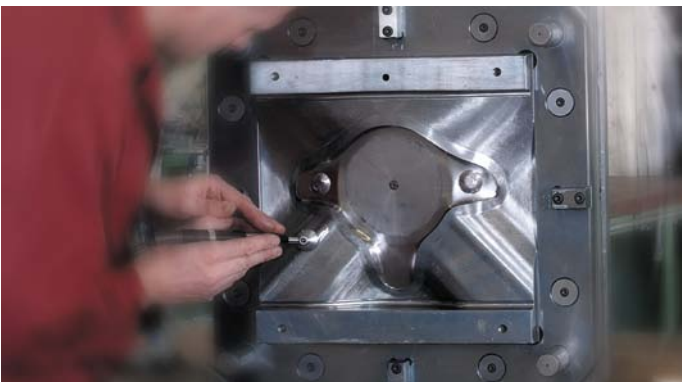

Our technical office can communicate with any interface.

ST.F

The production

The quality of our product, keeping to delivery times and assistance are the foundations on which the ST.F production cycle is based. The flexibility of the CNC machines used (connected in line with the technical office) and the experience and professionalism of our operators are the production departments' major assets.

ST.F

The products

ST.F production areas encompass the most diversified sectors in mechanical design:

motor car, telephony, food, electrical, electrical household appliances, furnishing, window and door frames, airconditioning, textile machinery, hydraulic, gear wheels and photographic.
